

Inspection of Quintip Chemical Co.  
Sanitary Landfill Site, Edison Twp.

Site is 92 acres consisting of about 60 acres of upland sandy lawns and about 32 acres of marshland. The marshland extends for about  $\frac{1}{2}$  to 1 mile to the Raritan River. The landfill site is on the north bank of the Raritan River adjacent to the Edison Twp. Landfill site.

The inspection tour was made in the company of Mr. Jim Stein (Chemical-Chemline Co.) and Mr. Hans Schaff (Quintip Chemical Treatment Co.). Messrs. Bern and Bust represented GAF.

According to Mr. Hans Schaff, the subject landfill site is currently handling 60-70 truck loads (18-22 cubic yard truck load per day) of municipal refuse (trash & garbage) plus some industrial waste. Mr. Schaff stated that they were receiving industrial chemical wastes from the following companies at sites in New York as well as New Jersey. A bulldozer was working at the dump site constantly pushing many refuse to the landfill face and then covering it with dirt. The dirt

Continental Can Co.

Mr. Schaff stated that his company carried about \$1.2 MM public liability insurance consisting of two policies - one with Continental Insurance Co. and one with Lloyd's of London. Mr. Schaff also stated that the landfill was operated under a permit filed with Edison Township in the name of the Kim-Bac Co., which is a wholly owned subsidiary of the Scientific Chemical Treatment Co. The trucks used to haul industrial waste to the landfill site are also under permit to Edison Township and are registered in the name of Scientific Chemical Treatment Co. Vehicles used for hauling chemical waste are closed van trucks and for volatile waste are ICC registered tank trucks.
